

Report A Street Light Outage

How do I report a street light outage?

The streetlights in Springhurst are maintained by LG&E. The Springhurst Community Association pays a monthly fee for each light.

To report a light outage by phone - you should call LG&E @ 589 3500. They will want to know the address where the light is and probably your telephone number. **Be sure to tell them it is a paid light.** When we have lights that are not working we still pay for them.
