

SCA Snow Removal Plan

Snowfall of 4-6 inches: The 4 inch level would automatically trigger basic snowplowing by our contractor. Also see attached Map and listing of areas to be plowed

Roadway De-icing/salting in the same hills and entrance areas on the Hills and Entrance listing and on the map, but only upon SCA notification to our contractor that such is necessary.

Snowfall of 7-9 inches: Same as above, but cost may be increased. In such a situation our contractor will need to obtain approval for the increased cost estimate.

Snowfall of 10 inches or more: Same as the 7-9 inch item above. But additional snow plowing may be necessary at the discretion of SCA. **Only** the following areas would be plowed, **not the entire subdivision:**

The entire length of White Blossom Blvd.

Wynbrooke Circle between White Blossom Blvd and the hill area.

The area between the entrance to Felsmere and the Felsmere Circle hill area.

The hill area on Springstead Circle to the right in Felsmere.

ENTRANCES TO BE CLEARED OR PRETREATED
SEE RED DOTS ON THE ATTACHED MAP
